DETAILED ACTION

Election/Restrictions

This application contains disclosed species in the specification, the following patently distinct species identified as:

(1) An investing method, system and device for the purpose of using interest or dividends earned on investment principal to purchase options.

(2) An investing system for using and a device comprising databases and servers in which client information is input, by which clients are certified, by which product and sales information is stored, in which new clients are added and existing clients can cancel contracts.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations

Art Unit: 3628

of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patently distinct, applicant should submit evidence or identify such now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 USC 103(a) of the other invention.
